HISTORICAL INFORMATION

WARRINGTON
TOWNSHIP

MOLAND HOUSE

Warwick Township was officially organized in 1733. With a little imagination, you can picture the traffic on York Road in those days—stagecoaches and horse-drawn carts. Quite different from today's traffic!

Did you know that George Washington's army of 11,000 men camped here in August 1777? Local legend says that the Stars and Stripes were unfurled before American Troops for the first time during the encampment.

Washington headquartered for two weeks at the Moland House, which lies on the original York Road, one half mile north of Bristol Road. The Warwick Township Historical Society cares for the 18th century farmhouse.

If you would like to get involved with the Historical Society, please visit their website at moland.org.

Other historical structures in Warwick Township include the Neshaminy Warwick Presbyterian Church and the Eight Arch Stone Bridge built in 1804.

WHEN IS A PERMIT NEEDED

Permits are required for, but not limited to, all additions, basement finishes, sheds, decks, fireplaces, chimneys, pools, fences, dormers, window or door enlargements, re-roofing, electrical or plumbing, heating, venting, or air conditioning system installation or replacement. More information on what projects require permits can be found on our website at warwick-bucks.com/permitsforms/.

The Township also requires occupancy inspections prior to each new owner or tenant for residential, commercial and industrial uses. Please contact Robert Prato, Fire Inspector/Code Enforcement at 215-343-6100.

If you have any questions about contemplated construction, a proposed use or occupancy change, please contact Thomas Jones, Zoning Officer at 215-343-6100.

PERMITS are NOT required to replace exterior siding, windows, or doors when replaced in-kind.

Why do we need permits?

1. Permits allow the Township to ensure all structures are safe and meet regulations. Your building plans are reviewed by certified inspectors, knowledgeable in building, plumbing and mechanical codes. Electrical requires third-party review and approval. They also inspect your project at several points throughout the project. This ensures that your structure meets the current Building Codes, as adopted by the Township.

2. During zoning review, our staff ensures that you are meeting all requirements for setbacks, - the distances from your boundary lines. We also ensure your project doesn't obstruct the flow of stormwater (such as through a swale); encroach on any Township right-of-way; or obstruct the view of traffic along our roadways.

Permit Fees

Permit fees vary by project. A flat fee may be used, or the fee may be calculated by the cost of the project, square footage, and/or number of fixtures.

CONTRACTOR REGISTRATION

All residential new construction, commercial contractors, and sub-contractors are required to register with the Township Administrative Office. Contractors must supply the Township with a current certificate of insurance.
